- **Highly experienced instructors**
- **Fully resourced Cambridge training centre**
- **Hosting at customer sites**
- **Full support & training materials provided**
- **Training on demo or customer databases**

Realworld Systems provide a wide range of training courses in GE Smallworld and in-house software products. Courses can consist of standard modules or tailored modules to fulfill specific customer requirements.

We aim to make our courses both interesting and relevant in order to provide you with the confidence and skills to use the products to their full potential. Realworld Systems are also able to provide an independent viewpoint on software and the ability to identify & fulfill other requirements such as consultancy or software development.

Below are examples of courses, other course details available on request.

Smallworld Courses

Network Inventory Products Suite

PNI
Physical Network Inventory overview, user and upgrade courses

LNI
Logical Network Inventory product user & configuration courses

NIG
Network Inventory Gateway physical browser course

Further GE Modules
Including; Design Manager, Magik, System administration, Data modeling, Configuration & XML, Application development
