

## **SMALLWORLD GIS SOFTWARE DEVELOPERS/ MAGIK PROGRAMMERS**

**Cambridge, England**

Realworld Systems Ltd, a Cambridge based Software Development and Consultancy company require an experienced Smallworld Developer/Magik Programmer.  
Permanent full-time position in UK, however long term contractors may be considered.

### **Description:**

- Development / enhancement of Physical and Logical Network Inventory software.
- Magik programming, customisation of object oriented software.
- Intranet and Internet application development and debugging.
- System administration. Liaising with Customers, consultants and support activities.

### **Essential Skills/Qualifications:**

- Technical IT background and Computer Science Degree or equivalent.
- Knowledge of Magik, Java and other Programming experience.
- A minimum of 2 years experience of GE SW GIS.

### **Desired Skills/Qualifications:**

- Knowledge of Object Oriented or Geographical Information Systems (GIS), particularly GE Smallworld.
- Knowledge of Windows and Unix operating systems.
- Willingness to travel in the UK and/or overseas.

### **Salary/Benefits:**

Salary is competitive with excellent benefits including private health care, pension, life assurance and income protection.

### **IMPORTANT:**

Main office base is Cambridge, England, however traveling globally is sometimes required within this role.

There is also potential for you to eventually work at any of our global offices if desired.

You should already be able to work freely and legally within the UK and allowed to travel globally, or hold a suitable permit to do so.

**Please apply by emailing your CV to Realworld Systems at the address below indicating your date of availability.**
